

QCN01M6-02P-02S

Power Signal+ Pneumatic/Hydraulic

It's a integrated slip ring with air,power and Ethernet,pneumatic electrical rotary union support 2-12 passage way pneumatic/hydraulic, it can combine with power,signal,Ethernet,USB,device net,control net,Canbus on request. It also could be mounted by shaft or optional flange mounting.Passage media types can use air/gas,chemical,tap water,oil,water.Typical application including automatic equipment, machinery manufacturing ,food processing etc.

Features

- ◆ Low torque
- ◆ Smooth rotation
- ◆ Power Ethernet,air mixed
- ◆ Flange installation

Applications

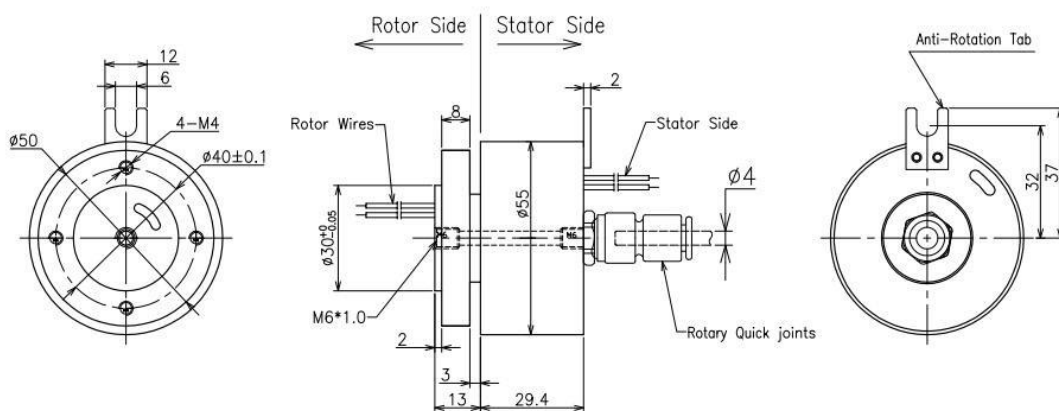

- ◆ Automatic equipment
- ◆ Food processing
- ◆ Machinery manufacturing
- ◆ Medical equipment

Optional

- ◆ Air channel
- ◆ Circuit number
- ◆ Current rating,signal type
- ◆ Interface size

QCN01M6-02P-02S	Specification	Picture
Circuits	1*air,1*Ethernet,5*3A	
Interface size	G1/4" & 10mm tube	
Voltage	0-24VAC/VDC	
Operating temperature	-20C°~+60C°	
Air pressure	Max 10Bar	
Housing material	Aluminum alloy	
Working speed	0~100 rpm	
Install way	Flange installation	
Contact material	Precious metal
